Register Books and Statistical Publications

issued by the Committee of Lloyd's Register of Shipping

Register of Ships

Published annually in July (in three volumes A-G, H-O and P-Z) the Register contains the names, classes and general information concerning the ships classed by Lloyd's Register of Shipping (including the British Corporation Register); also particulars of all known self-propelled sea-going merchant ships in the world with a gross tonnage of 100 and above. Air cushion vehicles (including those classed by Lloyd's Register) can now be found in the main body.

Volume 3 includes information covering former names of ships, compound names of ships, Lloyd's Register classed mooring buoys, miscellaneous pontoons and docking installations.

The Register is kept up to date by means of ten cumulative Supplements containing changes of name, ownership, flag, tonnage, etc. for all ships, together with a cumulative list of new ships not recorded in the Register itself. As data in Supplement 10 is not included in the Register of Ships, but is repeated in Supplement 1, subscribers should retain their copy of Supplement 10 until receipt of Supplement 1. Also included is a Classification Survey Dates section containing the latest survey records for all Lloyd's Register classed ships. The Supplement will be issued from August 1993 to June 1994.

A **Weekly List of Alterations** to the Register of Ships is also published.

List of Shipowners

Published annually in September this volume contains a list of owners and managers of the ships recorded in the Register with their fleets, postal addresses, telephone numbers, telefax numbers, telex numbers and cable addresses. Managing agents, not recorded in the Register of Ships, are shown together with ships for which they act and are cross-referred to owners.

Eight cumulative supplements will be issued from October 1993 to June 1994.

World Fleet Statistics

This publication, which replaces the Statistical Tables and Annual Summary of Merchant Ships Completed, reflects the world fleet of propelled sea-going merchant ships of not less than 100 gross tons as at the end of a calendar year. Published annually in March, the Tables include the world fleet categorised by flag state, ship-type, size and age. Ships completed during the calendar year are also considered by country of build, ship-type and size.

Casualty Return

Published annually in June, the Casualty Return comprises statistical summaries of all merchant ships totally lost or reported broken up during the previous calendar year. Brief details of all the ships included in the above summaries are also given, together with details of incidents and disposal.

Register of Classed Yachts

Published annually, this Register contains full particulars of yachts currently holding the Society's class, together with records of periodical surveys carried out. Names and addresses of owners are also included.

Register of Offshore Units, Submersibles and Underwater Systems

Published annually in October, the sections include units in existence and under construction and contain mobile drilling rigs able to operate in at least 50 feet of water, former names of mobile drilling rigs, submersibles, underwater systems (where classed with Lloyd's Register), selected work units (ships, barges and platforms used for offshore construction, maintenance, pipelaying, heavy lifting, fire-fighting and submersible and diving support) and former names of work units. Also included is a list of owners' names, addresses, telex, telephone and telefax numbers, for owners of equipment in these sections together with a section which includes owners and managers of offshore support ships with their addresses, telex, telephone and telefax numbers, listing the ships owned or managed by them. Further details of these vessels may be found by reference to the Register of Ships.

Maritime Guide

Published annually in February, the Maritime Guide includes sections on dry and wet docks, a gazetteer, maps, postal and telecommunication addresses, call signs (indexed to ship name), shipbuilders with names of existing ships built by them, shipbuilders, marine enginebuilders, boilermakers and manufacturers of offshore and associated structures listed by country and addresses of marine insurance companies.

Merchant Shipbuilding Returns

A quarterly statistical summary of world shipbuilding for all self-propelled merchant ships of 100 gross tonnage and above which are on order or under construction. Tables include analyses by country of build, size, ship-type and registration.

Shipyard Orders Weekly Report

A list of confirmed new orders reported during the week, showing selected items of information. Also included are sections on reported cancellations and completions.

Lloyd's World Shipowning Groups

Column Headers

Headers in eight languages, to assist in reading particulars of a ship in the Register, will be found inside the front cover of the first volume.

Alphabetical order of ships

Ships' names commencing with an *abbreviation of a word,* e.g. DR. (Doctor) or ST. (Saint), are to be found listed in strict alphabetical order *immediately before* other ships whose names commence with the letters DRA or STA respectively.

Ships' names commencing with a *Roman numeral* are listed under the letter of the numeral, e.g. XXX ANIVERSARIO appears under letter X.

Conversion Factors

1 tonne = 0,984 ton (British)
1 mm = 0,039 in
1 m = 3,281 ft
1 m^2 = 10,764 ft^2
1 m^3 = 35, 315 ft^3
°F = (1,8 x °C) + 32
1 kW = 1,341 hp (British) = 1,360 hp (metric)

Former names
The figures following the former name of a ship indicate the year in which the change of name occurred. Former names are retained in the Register throughout the life of the ship, and an index to these names is included in the Register of Ships Subsidiary Sections.

Owners
The registered owners are recorded in **bold type.** The underlined letter in each owner's name indicates the letter under which the entry appears in the List of Shipowners.

Managers
The managers of the ships are recorded if desired. The underlined letter in each manager's name indicates the letter under which the entry appears in the List of Shipowners.

Port of Registry
A port printed in *italic type* is the home port of a ship and is shown where there is no port of registry.
An entry printed in parentheses indicates the last known port of registry.

Flag
Indicates national flag under which the ship normally operates.
An entry printed in parentheses indicates the last known flag.

N.B. Ships registered in the former U.S.S.R. will be shown as 'last known' port and flag until confirmation of re-registration is received.

China* indicates ships with home ports in China, Republic of (Taiwan).

Satellite Communication Identity No.
The identification number and answerback assigned by the appropriate authority.

3 (TONS)

Gross tonnage
The Gross Tonnage printed in **bold type** indicates that the ship has been measured in accordance with tonnage regulations adopted prior to the coming into force of the International Convention on Tonnage Measurement of Ships 1969 on 18th July 1982. This Gross Tonnage is broadly, the capacity in cubic feet of the spaces within the hull, and of the enclosed spaces above the deck available for cargo, stores, fuel, passengers and crew, with certain exceptions, divided by 100. Thus 100 cubic feet of capacity is equivalent to 1 gross ton.
The Gross Tonnage printed in *italic type* indicates that the ship has been measured in accordance with the requirements of the International Convention on Tonnage Measurement of Ships1969 and is derived by formula in accordance with those requirements.

Net tonnage
The Net Tonnage is derived from the corresponding Gross Tonnage printed in bold type by deducting spaces used for the accommodation of the master, officers, crew, navigation, and propelling machinery.
The Net Tonnage printed in *italic type* is derived by formula in accordance with the requirements of the International Convention on Tonnage Measurement of Ships 1969.

Deadweight
The weight in tonnes (1000 kg) of cargo, stores, fuel, passengers and crew carried by the ship when loaded to her maximum summer loadline.

Shelter deck ships
OSD/CSD in column 6 indicates that the ship is a shelter-decker having arrangements for facilitating ready conversion from the open to the closed shelter deck condition or vice-versa. In the open condition the greater part of the upper 'tween-decks space is exempt and not included in the tonnage; in the closed condition the upper 'tween-decks space is included and consequently the tonnages in the CSD condition are greater than in the OSD. When available, tonnages for both conditions are recorded in the Register, the lower (OSD) tonnages printed above the greater (CSD) tonnages.

T.Mk (Tonnage Mark)
T.Mk in column 3 indicates that the ship has a Tonnage Mark painted, in addition to the Load Line marks, on each side of the ship aft of the Load Line Disc. In its simplest form the Tonnage Mark is a horizontal line with an equilateral triangle standing vertex down on it.
In cases of this kind when two sets of tonnages are recorded the set of smaller tonnages applies when the ship is not loaded beyond the draught indicated by the horizontal line of the Tonnage Mark, and the set of greater tonnages applies when the ship is loaded deeper than that draught; the Load Line Disc is positioned higher on the ship's sides than the Tonnage Mark. The difference between the two sets of tonnages is in accordance with amended Tonnage Regulations now in force for some countries under which tonnages may be measured either excluding the greater part of the upper 'tween-decks space even without a tonnage hatch in the upper deck, or including the upper 'tween-decks space.
In other cases only one set of tonnages is recorded. In these the horizontal line of the Tonnage Mark on the ship's sides is level with the deepest load line; the ship may not therefore load beyond the draught indicated by the horizontal line of the Tonnage Mark. The tonnage is exclusive of the greater part of the upper 'tween-decks space and the draught is less than the maximum allowed under the Load Line Convention.

Ore/Oil carriers
Two gross and two net tonnages may also be recorded for a ship which is designed to carry either ore or oil cargoes.

Tonnes per centimetre immersion
The weight in tonnes (1000 kg) required to immerse the hull by one centimetre at a particular draught. The value shown in the Register is that corresponding to the maximum summer draught.

4 (CLASSIFICATION)

Classification symbols of Lloyd's Register of Shipping Hull and equipment

✠	This distinguishing mark denotes that the ship was constructed under the Society's Special Survey in compliance with the Society's Rules.
100	Character figure assigned to ships considered suitable for sea-going service.
A	Character letter assigned to ships which have been constructed or accepted into class in accordance with the Society's Rules and Regulations and which are maintained in good and efficient condition.
1	The character figure is assigned to: (a) Ships having on board, in good and efficient condition, anchoring and/or mooring equipment in accordance with the Rules. (b) Ships classed for special service, for which no specific anchoring and mooring Rules have been published, having on board, in good and efficient condition, anchoring and /or mooring equipment considered suitable and sufficient by the Society for the particular service.
—	This character symbol, in the position usually occupied by the figure **1**, is assigned to ships when the anchoring and mooring equipment is not in accordance with the requirements of the Rules but is considered to be acceptable for the particular service. This symbol no longer assigned.
N	Character letter assigned to ships on which anchoring and mooring equipment need not be fitted in view of their particular service.
T	Character letter assigned to ships which are intended to perform their primary designed service function only while they are anchored, moored, towed or linked and which have in good and efficient condition, adequately attached anchoring, mooring, towing or linking equipment which has been approved as suitable and sufficient for the inland service.
OU	Character letters assigned to offshore units classed with Lloyd's Register, assigned to self-propelled or non-propelled offshore units other than ships.
Cont. or Rest	Indicates continuation or restoration of class after the original term of years has expired. A number of years suffixed to the character, thus -8yrs, indicates the period of extension granted.
with freeboard with fbd	Signifies that the freeboard assigned is a condition of the ship's class. The scantlings of ships built since 1949 are based upon a specific draught and this notation is no longer assigned.

Classification symbols of the British Corporation (united with Lloyd's Register in 1949) Hull and equipment

*	Denotes that the ship was built under the supervision of the surveyors in accordance with the Rules of the British Corporation.
BS	Hull and equipment of iron or steel ships classed according to British Corporation Rules.
with freeboard with fbd	Denotes that the hull has been built with modified scantlings and arrangements approved for service in any part of the world at the assigned freeboard. This notation was discontinued in 1947.

Descriptions and abbreviations used in classification notations

Service restriction notations will generally be assigned in one of the following forms but this does not preclude special consideration for other forms in unusual cases.

Protected waters service: Prior to 1978, this notation indicated that the ship was intended to operate only within protected waters of harbours, rivers, lakes and sheltered estuaries having a fetch of 6 nautical miles or less. The description of this service, as amended by the Society's Classification Regulations effective from January 1978, means that the ship is suitable for service in sheltered water adjacent to sandbanks, reefs, breakwaters or other coastal features, and in sheltered water between islands.

Extended protected waters service: This notation means that the ship is intended for service in protected waters and also for short distances (generally less than 15 nautical miles) beyond protected waters in reasonable weather.

('Fetch', 'sheltered water' and 'reasonable weather' are defined in the Society's Classification Regulations.)

Restricted service: This notation means that the ship is intended to operate in estuaries, harbours and/or adjacent waters, and also outside sheltered water but only for short distances (generally less than 15 nautical miles) and in reasonable weather. This notation is no longer assigned.

Specified coastal service: This notation means that the ship is intended for service along a coast, the geographical limits of which are indicated, and for a distance out to sea generally not exceeding 21 nautical miles, unless some other distance is specified for 'coastal service' by the Administration with which the ship is registered, or by the Administration of the Coast off which it is operating, as applicable.

Specified route service: This notation means that the ship is intended for service between two or more ports or other geographical features which are indicated.

Specified operating area service: This notation means that the ship is intended for service within one or more geographical areas as indicated.

Short international voyage: This expression means an international voyage in the course of which a ship is not more than 200 nautical miles from a port or place in which the passengers and crew could be placed in safety, and which does not exceed 600 nautical miles in length between the last port of call in the country in which the voyage begins and the final port of destination. This notation is no longer assigned.

Prior to 1948, the character figure **100** was not included in the class notation of ships intended for limited sea-going service.

Heavy Cargoes (i.e. ore etc.). When the scantlings and arrangements have been approved for the carriage of such cargoes a class notation 'Strengthened for heavy cargoes' is assigned. As from January 1978 this notation will continue to be assigned to general cargo ships and bulk carriers, where applicable, but in the case of ore or oil carriers the class notation 'ore carrier' or 'ore or oil carrier' will be assigned.

'Strengthened for regular discharge by heavy grabs' is assigned at the owners option where cargoes are regularly discharged by heavy grabs, and the thickness of the plating of the hold inner bottom, hopper and transverse bulkhead bottom stool is increased in accordance with rule requirements.

Date of build

For ships built under the supervision of Lloyd's Register surveyors, the date of build, specified by the year and month, shall be the date at which the new construction survey process is completed. The date of commissioning may be specified in case of substantial delay between completion of construction and the ship commencing active service.

For ships built under the supervision of other classification societies, the date of build shall be the year as shown in their respective Registers. For other ships, the reported year of completion of construction is shown.

In all instances where there has been a significant interval between the launching and the completion or commissioning of the ship, two dates are recorded prefixed by Lch. and Cmpl. or Cmd. The abbreviation Recmd. means recommissioned.

Shipbuilders and place of build

This normally records the shipyard where the hull of the ship was built. When it is known that major sections of the hull have been constructed by other builders, their names are also recorded, but the entry of a single builder's name in no way implies that all of the hull has been fabricated in that yard.
The underlined letter indicates the letter under which the shipbuilder appears in the List of Shipbuilders.

Yard number

The shipbuilder's number(s) is shown for the hull section(s).

Overall length

The extreme length of the ship.
Bulbous bow (BB): When the overall length is followed by the notation (BB) this indicates that the ship has a bulbous bow and the overall length recorded includes any protrusion of that bow.

Registered length

If the overall length is not available, the registered length as given on the ship's Certificate of Registry, is recorded in *italics*, thus *124,62*.

Length B.P. (between perpendiculars)

The distance on the summer load waterline from the fore side of the stem to the after side of the rudder post, or to the centre of the rudder stock if there is no rudder post.

Extreme Breadth

The extreme breadth is the maximum breadth to the outside of the ship's structure and in paddle ships includes the paddle boxes.

Moulded breadth

The moulded breadth is the greatest breadth at amidships from heel of frame to heel of frame.

Maximum draught

In most cases this is the maximum summer draught amidships, but in some ships of special construction the maximum draught is at the after end, and this figure is recorded.

FW (fresh water): for ships employed on the Great Lakes and rivers, whose freeboards are assigned by Lloyd's Register, the summer draught in fresh water is inserted followed by the letters FW.

OSD/CSD ships: For such ships, as indicated in column 6, the summer draught in the open condition is recorded, followed by the draught in the closed condition.

Ships assigned tonnage marks: For ships to which tonnage marks have been assigned, as indicated in column 3, the draughts recorded are those at the tonnage mark and the summer (maximum) load line respectively.

Moulded depth

The moulded depth is the vertical distance at amidships from the top of keel to the top of the upper deck beam at side.

PASSENGER SHIP

Ship designed with a multi-deck hull and superstructure specifically for the carriage of passengers for whom cabin accommodation is provided for twelve or more. The trading may be that of cruising or excursion.
Various features may include:

- additional forward hold or holds for the carriage of cargo, access to which is by lift on/lift off.

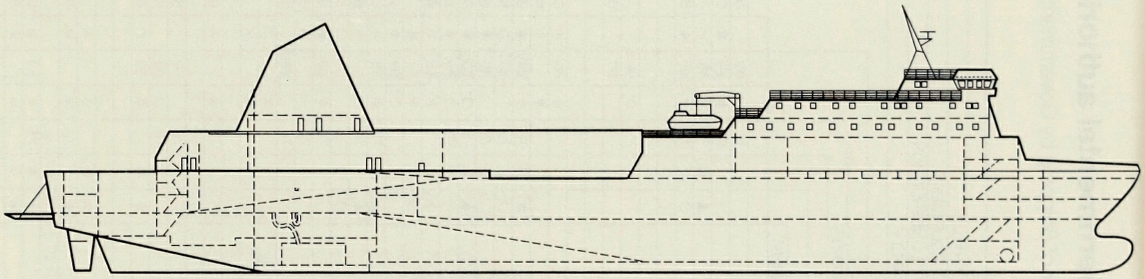
Related types include:
Ferry – a ship designed to carry passengers, cabin accommodation for twelve or less of whom is provided, on a short-haul service.
Passenger/Roro Cargo – a passenger ship provided with additional decks in the hull for the carriage of laden vehicles, access to which is by stern and/or bow door/ramps.
Passenger/Roro Cargo/Ferry – a Passenger/Roro Cargo Ship with a certificate to carry more passengers than for whom cabin accommodation is provided.

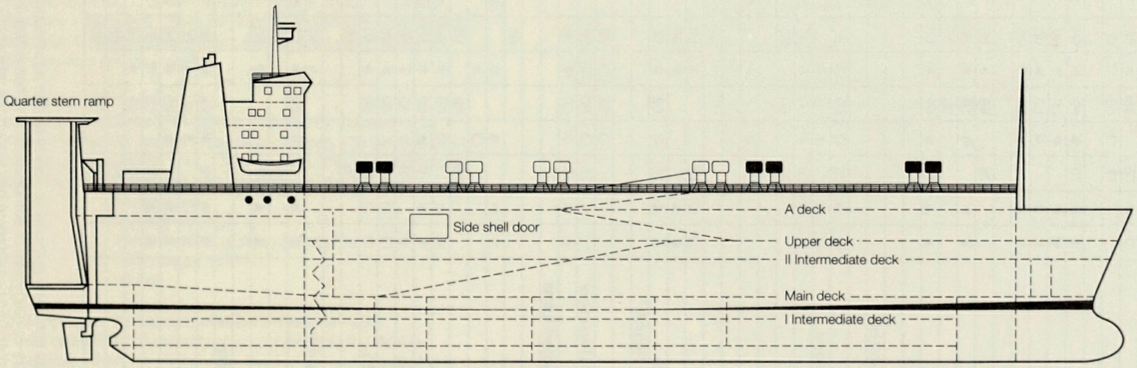
RORO CARGO

Ship designed with a multi-deck hull specifically for the carriage of road and/or rail vehicles, and cargo which can be loaded/unloaded by wheeled transport.
The cargo handling mode is roll on/roll off to and from the internal decks by way of a door/ramp situated below the weather deck.
Various features may include:

- One or more decks fitted with fixed rails for the carriage of railway vehicles either exclusively or simultaneously with road vehicles on the same or separate decks.
- additional cargo handling of lift on/lift off to and from the weather deck, or onto the roro deck by way of weather deck hatches.
- internal ramps or elevators for the movement of cargo between decks (including the weather deck).
- cabins for lorry drivers.
- side loading facilities for the loading of pallets containing such cargoes as paper rolls.

Related types include:
Landing craft – a roro cargo ship of single deck design where cargo is carried only on the weather deck, and access is by a bow-ramp. Additional features may include tanks beneath the deck for the carriage of oil and /or water.
Roro Cargo/Ferry – a ship designed to carry both roro cargo and passengers, for whom cabin accommodation is not provided, on a short-haul service. The roro cargo may be carried on internal weather decks or on the weather deck. May also be double-ended for ease of operation.

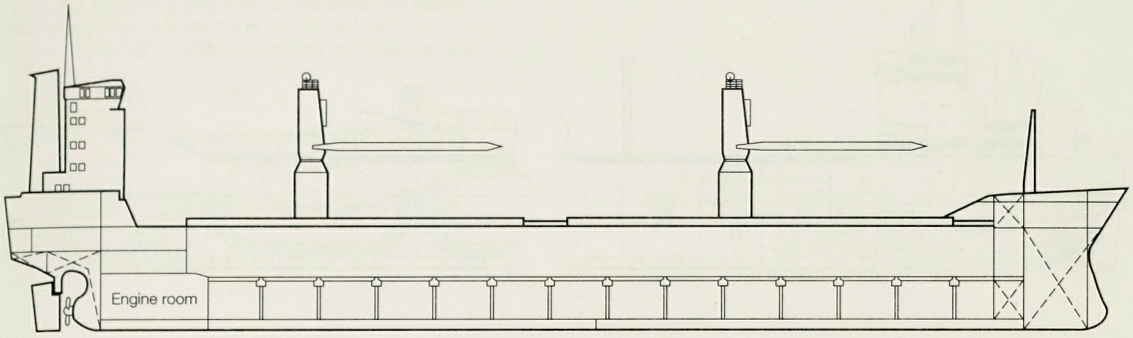




VEHICLES CARRIER

Ship designed with a multi-deck hull, or multi-deck hull and superstructure, specifically for the carriage of new unladen road vehicles.
The cargo handling mode is roll on/roll off to and from internal decks (of light construction) by way of doors/ramps and internal ramps between decks.
Various features may include:

- the carriage of other (heavier) cargo and/or (laden) vehicles on one or more strengthened vehicle decks.



GENERAL CARGO

Ship designed with a single deck hull which includes a single hold or arrangement of holds, or a hull which includes an arrangement of holds and 'tween decks, specifically for the carriage of diverse forms of dry cargo.
The cargo handling mode is lift on/lift off to and from the holds (and 'tween decks) by way of weather deck (and 'tween deck) hatches.
Various features may include:

- a single deck, double skin sides and wide deck openings (box shape holds). Ships of this type may be intended specifically for the carriage of forest products, cargo handling of which may be by use of gantry crane.
- strengthening for the carriage of heavy cargoes (including ore).
- certain holds equipped with container securing arrangements, hoistable or movable vehicle decks, or other facilities pertaining to the carriage of a particular type of cargo.
- the weather deck equipped with container securing arrangements, or arrangements for the carriage of timber.
